

Difference

between

Truth and Falsehood

Once Akbar asked Birbal:

**What is the
difference between truth and
falsehood?**

Without pausing for a moment Birbal replied:

Sir,
four inches.

How?

Your majesty, we hear with our ears and see with our eyes. What we see is truth, not what we hear. Hence, the difference between truth and falsehood is only four inches.

MORAL :

We must believe what we see and not what we hear. Seeing is believing. If we hear from the right source only then we must believe.
