

Foolish Pot Maker

Once there was an earthen pot seller.

This pot sells
for 2 bucks in the market,
and it costs me only one
buck to make it. I earn
100% profit!

**If i reinvest my profit,
the total profit will double.
This way i can keep
reinvesting ...**

And soon
i will become a
millionaire...

Then I'll marry
a girl who will cook
for me and obey my
commands ...

Well, if she won't
do what i would ask her to, then
i'll kick her like this ...

So one pot was there and he kicked it and it broke.

**Oh, darn!
I broke my real pot,
to kick that imaginary wife!
What a fool i am. I have
become poor again.**

MORAL :

We must not kick the present by constantly thinking about the future. present moment is the gift of God and we must utilize in serving him and making our lives perfect.
